Serverless Authentication for APIs using Cognito

A hands-on session by, *Harrish Ragavendar*
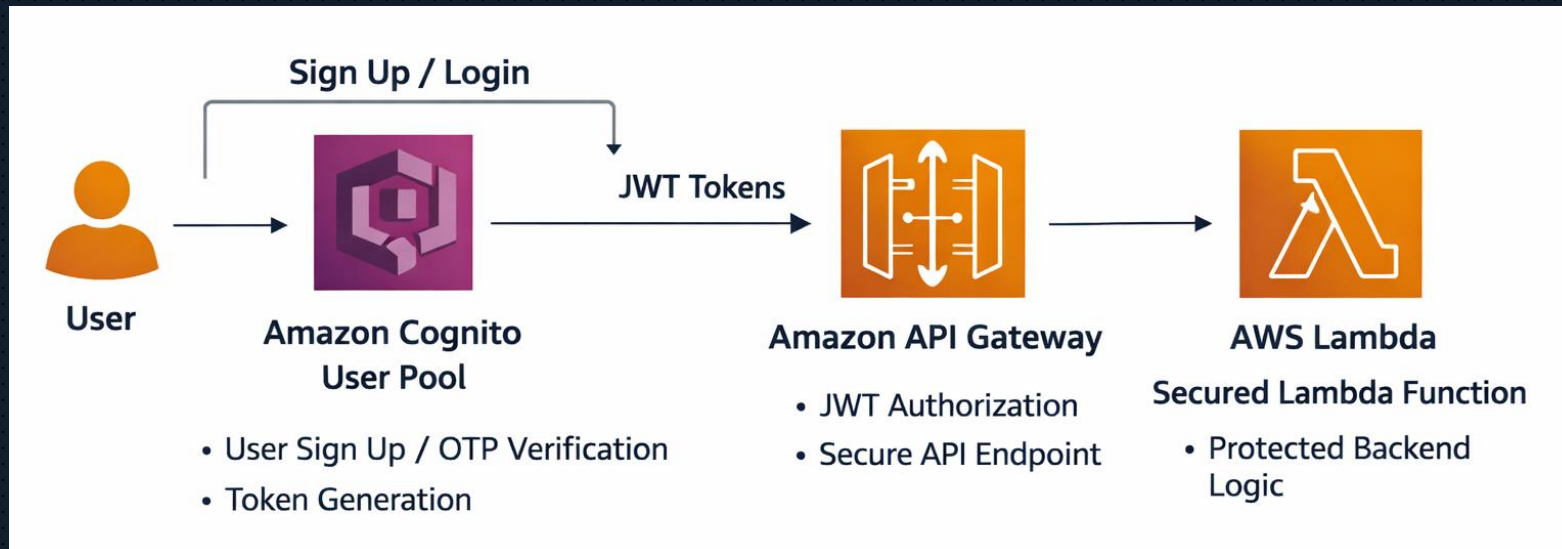

AWS Community Builder - Serverless

Harrish Ragavendar S | **AWS Community Builder** | **Serverless**

Agenda

- Configure Amazon Cognito User Pool for email-based user signup and OTP verification.

- Enable JWT token issuance for authenticated users after successful login.

- Create HTTP APIs using Amazon API Gateway with Cognito JWT authorizer.

- Implement protected AWS Lambda functions invoked only after token validation.
